Detail-oriented Computer Science major Data Science currently attending Sendirian Berhad University Malaysia with 2 years working experience. Aiming to leverage a proven knowledge of web development, system development, and programming skills to successfully fill the Computer Science Internship role at your company. Frequently praised as hard-working by my peers, I can be relied upon to help your company achieve its goals.

EXPERIENCES

NOVEMBER 2021 – PRESENT

LEAD WEB DEVELOPER, MI SIFULAN

- Design, build, or maintain web sites, using authoring or scripting languages, content creation tools, management tools, and digital media.
- Perform or direct web site updates.
- Confer with management or development teams to prioritize needs, resolve conflicts, develop content criteria, or choose solutions.
- Back up files from web sites to local directories for instant recovery in case of problems.
- Identify problems uncovered by testing or customer feedback, and correct problems or refer problems to appropriate personnel for correction.
- Evaluate code to ensure that it is valid, is properly structured, meets industry standards and is compatible with browsers, devices, or operating systems.
- Maintain understanding of current web technologies or programming practices through continuing education, reading, or participation in professional conferences, workshops, or groups.
- Analyse user needs to determine technical requirements.
- Develop databases that support web applications and web sites.
- Perform web site tests according to planned schedules, or after any web site or product revisions.
- Select programming languages, design tools, or applications.
- Establish appropriate server directory trees.
- Provide clear, detailed descriptions of web site specifications such as product features, activities, software, communication protocols, programming languages, and operating systems software and hardware.
- Create web models or prototypes that include physical, interface, logical, or data models.
- Evaluate or recommend server hardware or software.

AUGUST 2019 – NOVEMBER 2021
CHIEF TECHNOLOGY OFFICE, SIFULAN

- Review project plans to plan and coordinate project activity.
- Manage backup, security, and user help systems.
- Develop and interpret organizational goals, policies, and procedures.
- Develop computer information resources, providing for data security and control, strategic computing, and disaster recovery.
- Consult with users, management, vendors, and technicians to assess computing needs and system requirements.
- Stay abreast of advances in technology.
- Provide users with technical support for computer problems.
- Evaluate data processing proposals to assess project feasibility and requirements.
- Evaluate the organization's technology use and needs and recommend improvements, such as hardware and software upgrades.
